ABOUT US

Wana Engineering Consulting cc is a fully owned Namibian multi-engineering consulting firm managed by previously disadvantaged Namibians. The firm is based in Ondangwa in the Oshana Region with a proposed satellite office soon to be established in Windhoek. This firm was established and registered with the sole intention of enhancing the lives of our fellow citizens.

We thrive in providing quality, cost effective and sustainable engineering solutions in engineering sectors such as infrastructure, transportation, water resources, electrical (Sub-consultants) and surveying (associates).

We are a group of engineers, surveyors and technicians who are committed to understanding the needs of our clients by developing close working relationships and thus focusing on unique cost-effective solutions that respect safety, environmental and social economic responsibilities. With our fields of expertise, we support our clients through all phases of a project ranging from inception, concept designs, feasibility studies, detail designs, contract management and supervision all the way through to post-construction monitoring.

OUR MISSION

Our mission is to provide quality professional engineering services to enhance the communities and infrastructure of our clients by keeping to our morals of discipline, honesty and integrity. We strive on innovation and cost effectiveness to deliver and build permanent relationships with our clients.

OUR VISION

Our vision is to become the preferred consulting engineering firm in our field of expertise due to innovation, cost-effectiveness and efficiency.

CORE VALUES

Our operations are governed by the following values:

- Clear appreciation of our clients needs and requirements.
- Tailoring solutions to satisfactorily meet the needs and requirements of clients.
- Nurturing an environment that supports the professional and personal growth of its employees.
- Cost-effective and high-quality products and services to clients.
- Honesty and integrity in the interactions with clients and with the community.
- Innovation and initiative in providing solutions to issues that may arise in infrastructure development.

OUR TEAM

We have an energetic and highly motivated team of diverse professionals ranging from engineers, managers and technicians. The professionals are carefully selected in order to ensure the correct mix of expertise, while retaining engineering knowledge and skills in the firm.

We impose a policy of seeking out and recruiting young up-and-coming professionals, especially from formerly disadvantaged backgrounds, as a means of empowering them and encouraging them to take their proper place within the local engineering fraternity.

The team is headed by Rudhi Wanamene who is a registered civil engineer and has vast experience in most aspects in engineering and brings with him 10 years of working experience in the engineering and construction sector.

MARKETS & OUR SERVICES

Markets – Our client base varies from governmental ministries, regional councils, established cities, town & village councils, private International and local companies as well as individuals

Services we offer:

We offer cost effective and sustainable engineering solutions in transportation, municipal infrastructure, water resources, electrical (sub-consultants) and surveying (associates).

Urban & Rural Arterial Roads:

Wana Engineering Consulting cc provides various cost-effective solutions for urban and rural roads, with vast staff experiences in labour based and plant-based gravel roads while also accommodating high-tech bitumen surfaced roads.

We specialize in:

- Detailed Pavement Design
- Geometric Design
- Concrete works (Bridges, culverts and concrete channels)
- Bid Documentation & Evaluations
- Contracts Management & Supervision

Structural Engineering

We offer top of the range structural designs and concepts for new developments. While designing state of the art structures we make provision for local available materials which can be customized to suit the clients needs.

We specialize in:

- Structural Analysis
- Detailed Structural Designs
- Structural Drawings
- Bid Documentation & Evaluations
- Contracts Management & Supervision

Sewer Reticulation, Sewer Pump Station & Oxidation Ponds

With close interaction with our clients and community we tailor design sewer reticulation networks to accommodate new and existing extensions within towns and cities. We further intergrate sewer networks to function as a system by designing sewer pump stations and lifting stations as well as oxidation ponds.

We specialize in:

- Detailed Sewer reticulation designs
- Design of oxidation ponds and sewer pump stations
- Bid Documentation & Evaluations
- Contracts Management & Supervision

Water Reticulation, Water Towers and Reservoirs

We specialize in the provision of bulk water and internal reticulation networks. We further intergrate water networks to function as a system by designing ground and elevated water reservoirs to accommodate water demands.

We specialize in:

- Detailed water reticulation designs
- Design of elevated and ground reservoirs
- Documentation & Contracts Management
- Contracts Management & Supervision

FIRM & STAFF EXPERIENCES

Since the firm is recently registered as a consulting member it does not have a lot of experience as an entity, however the personnel and team composition boost a wealth of working experience in the engineering and construction sector as can be seen on the CV's and qualifications of staff.

SOCIAL RESPONSIBILITY

As previously disadvantaged citizens we acknowledge the need to reinvest in our nation hence where we can we incorporate grants and sponsorships to assist communities and our nations at large.
